IADR Kulzer Travel Award 2020 – young researchers can now apply

In recognition of the research young scientists conduct in the field of dentistry and their significant contribution to further development in the sector, Kulzer awards young researchers with the IADR Travel Award. Young scientists can apply for the Award 2020 now.

Hanau/18.09.2019. With the IADR Kulzer Travel Award, Kulzer wants to encourage young scientists to undertake research in innovative testing methods of dental materials, and new ideas and approaches to improve and develop dental materials. In 2019, more than 60 scientists from various countries applied for the IADR Kulzer Travel Award. The rising number of applications shows that the reputation of this award has remarkably increased over the past few years.

The award covering the travel expenses will allow the winners to attend the 98th IADR General Session & Exhibition from 18 to 21 March 2020 in Washington, D.C. USA. The scientists will present their research results at the congress.

The award is granted to one researcher from each of the following regions, respectively: North America, Latin America, Europe, Africa/Middle East and Asia/Pacific.

Who can apply for the award? Young researchers (up to five years of post-graduation in the sector of dental, material science, specialty training, or pre-PhD) are eligible to apply for a travel award. Persons having already obtained a PhD are not eligible to apply again.

Here you will find more details on the award and the application procedure as well as information on the selection process: <http://www.iadr.org/IADR/Awards/Grants-Awards/Kulzer>.

KULZER
MITSUI CHEMICALS GROUP

About Kulzer

As one of the world's leading dental companies, Kulzer has been a reliable partner for all dental professionals for more than 80 years. Whether aesthetic or digital dentistry, tooth preservation, prosthetics or periodontology, Kulzer stands for trusted and innovative dental products. With optimal solutions and services, Kulzer aims to support its customers in restoring their patients' oral health in a safe, simple and efficient way. For this purpose, 1500 employees work in 26 locations in the fields of research, manufacturing and marketing.

Kulzer is part of the Mitsui Chemicals Group. The Japanese Mitsui Chemicals Inc. (MCI) based in Tokyo owns 131 affiliates with more than 13,400 employees in 27 countries. Its innovative and functional chemical products are as much in demand in the automotive, electronics and packaging industries as in environmental protection and healthcare.
