dima Print Denture Base 2

Stress-free digital dentures with 3D printing

More time for other things

- **Fast production time and less stress:** produce 10 arches of fully 3D printed dentures in **under 5 hours!**
- **Easy to learn:** 3D fabrication process is easy to learn and hand off among colleagues.
- **Less stress and time pressure:** **more time** to repair broken primary dentures when patients have a duplicate denture as back-up.

Higher profitability

- A fast and **cost-effective digital solution** to produce full and partial dentures, e.g. as permanent, back-up or travel dentures.
- Total material cost for fully 3D printed denture approx. **10 € per arch, incl. teeth.**
- Establish a new profitable business area while achieving exceptionally **precise results.**

Indications:

Full and partial dentures and temporary crowns & bridges.

2-IN-1: Natural Look & Familiar Handling

One material, two applications:

- **Time and money saving:** For both longterm temporary restorations and denture teeth – reducing material change, less cleaning, less storage...
- **High throughput:** print 120 units or more at a time with cara Print Cube in under two hours – Teeth or temporaries or both combined!
- **Workflow efficiency:** Comparable finishing process to milling, with time-saving and cost-effective production.
