## News 2025

- 1 Kulzer Vivida
- 2 Venus Diamond Flow Pure Shades
- 3 cara Print Cube
- 4 Pala Mill&Cast
- 5 HeraCeram cre-active

Dear Readers,

This brochure represents innovation, exchange, and new perspectives – and that's exactly what we aim to present with our product highlights. At Kulzer, we continuously strive to make the everyday work of dentists and dental technicians easier and more efficient. Our solutions are seamlessly connected, centered around simplifying workflows, intended to create true value for your practice and lab.

“Feels like Kulzer” – it's that moment when everything just fits. When products, solutions, and services seamlessly come together, making a noticeable difference in your daily work.

We invite you to discover our innovative solutions, connect with our experts and share your experiences on how our solutions can support your specific needs. After all, true progress arises from collaboration and dialogue.

From advanced 3D printing workflows and pioneering materials to innovative whitening solutions – our portfolio offers answers to the evolving demands of modern dentistry and dental technology. Behind every product showcased on the following pages is a team dedicated to actively shaping the future of dentistry. Be inspired, explore our innovations, and experience how technology and aesthetics go hand in hand.

We look forward to showing you how ideas become innovations and innovations become reality. Stay curious – the future starts now.

P. Christopher Holden  
CEO, Kulzer GmbH

# Kulzer Vivida

## A beautiful smile can be so easy

Kulzer Vivida offers gentle and effective tooth whitening – the Home Kit includes everything needed for a comprehensive whitening. Thanks to the unique Hydrogen Peroxide Superior (HPS) technology, this modern system reduces sensitivity, enables fast results in just 15-30 minutes and is easy to use – with no refrigeration needed. Designed for use at home and after a dental consultation, Kulzer Vivida is user-friendly, highly aesthetic and attractively designed, making it easy to use and appealing to patients.

### User benefits:

- Gentle and efficient tooth whitening with improved viscosity
- Fast results in just 15-30 minutes
- Convenient kit including Pre-Whitening Toothpaste, Whitening and Tooth Conditioner
- Room temperature storage and 36-months shelf life for optimized stock management

# Venus Diamond Flow Pure Shades

## Perfect aesthetics with just four shades

The new Venus Diamond Flow Pure Shades are the ideal solution for dentists seeking an aesthetic yet efficient alternative to multi-layer techniques. Four harmoniously coordinated shades simplify shade selection and deliver natural results – even in monochromatic applications.

Thanks to their flowable, thixotropic consistency, Venus Diamond Flow Pure Shades can be applied with precision, maintaining their shape and position while offering maximum flexibility for restorations. This makes them particularly suitable for Class V and minimally invasive Class III restorations. Their excellent polishability ensures a smooth, naturally-looking surface.

### User benefits:

- Only four shades for maximum efficiency
- Easy and quick application
- Natural and precise results

# cara Print Cube

**cara Print Cube & validated workflow: Precision, efficiency and affordability combined**

The cara Print Cube and the associated validated workflow offer a well thought-out complete solution for dental 3D printing. The generously sized build platform allows for the printing of up to five models at the same time, while the coordinated dima Print materials ensure the highest quality. With a resolution of 6K and an accuracy of 34 µm, the cara Print Cube consistently delivers precise results. The complementary product portfolio of cara Print Cockpit, cara Print CleanUp and cara Print LEDcure ensures a seamless, optimised workflow and reduces manual steps to a minimum.

**User benefits:**

- Integrated workflow for maximum efficiency and safety
- Precise and reproducible results thanks to validated printing parameters
- The smart solution for 3D printed models: dima Print Stone beige Smart

# Pala Mill&Cast

## The innovative workflow with high flexibility in denture design

With Pala Mill&Cast, you benefit from a precise and efficient denture workflow. It allows for individual transitions for a perfect red-white aesthetic and is applicable with the tooth libraries of Exocad and 3Shape. The monolithic manufacturing process reduces manual work steps to under 60 minutes. The precise workflow ensures that only minimal finishing is necessary – efficiency that pays off.

### User benefits:

- Flexible design options for dentures
- Reduced manual effort of less than 60 minutes including design
- Precise and long-lasting results

**Faster workflow, perfect fit:** [www.kulzer.com/mill-cast-expo](http://www.kulzer.com/mill-cast-expo)

exocad is a registered trademark of exocad GmbH. 3SHAPE is a trademark of 3Shape A/S.

# HeraCeram cre-active

The (all-in-one) aesthetic finishing solution

**Creativity meets efficiency: aesthetic individualisation made easy**

HeraCeram cre-active enables dental technicians to precisely individualise red & white parts of e.g. monolithic restorations made of any kind of Zirconium dioxide or Lithium disilicate in an efficient and reproducible way. Thanks to Zirconium high-quality 2D and 3D liquid ceramic components, natural-like light-dynamic appearance, surface structures as well as translucency effects can be created comfortably. The user-friendly consistency ensures easy processing and seamless integration into everyday laboratory work – for perfect aesthetic results with minimum effort.

**User benefits:**

**Technically perfect:** Comparable results before and after firing next to high shade stability and optimized consistency of the ready-use liquid ceramic masses for convenient application.

**Optically perfect:** Natural-like appearance and aesthetic upgrade of monolithic restorations thanks to controllable light-dynamic properties (fluorescent and opalescent effects) – even in thin layers.

**Simply perfect:** Versatile design options for red & white aesthetics – from standard staining procedure to advanced hybride micro-layering technique.
