Charisma® Flow
Naturally reliable.

Giving a hand to oral health.
Charisma® Flow –
The flowable all-rounder.

Charisma Flow is the ideal supplement to the line of universal Charisma composites. Its low viscosity and good thixotropy makes it the ideal choice for many indications, such as cavity lining, fissure sealing and minimal invasive fillings.

Charisma Flow stands for safe usage and a high standard of naturally reliable restorations

- Versatile all-rounder for many indications.
- Easy and fast handling due to its low viscosity and good thixotropy.
- Its radiopacity enables a safe and reliable diagnosis.
- Pronounced chameleon effect.
- Shades of Charisma Flow optimally match the Charisma shades.

The Charisma Flow Baseline is a white and opaque shade that can be applied on the cavity floor to mark the transition to the natural hard tooth tissue. This means that unnecessary drilling away of healthy hard tooth tissue when removing an insufficient filling can be avoided.
