

IDS 2019

EXPERIENCE WELL-KNOWN EXPERTISE

Whether for dentists or dental technicians: Kulzer offers a broad portfolio of solutions and supports all users in their daily routines at work. At the IDS fair, visitors can explore three areas where Kulzer presents its core competencies – with experienced experts on-site and exciting multilingual live demos.

HIGHLIGHTS AT THE BOOTH

- 1 cara i500**
Live in action: an exciting new intraoral scanner will be presented by experts on patients. Digital impression-taking has never been so easy.
- 2 Treating hypersensitivities**
Learn how to relieve patients from their hypersensitivity and experience the effectivity of GLUMA Desensitizer in live demos.
- 3 Intraoral repair**
Kulzer puts a focus on intraoral repairs with universal bondings, gives practical tips and tricks as well as live demos.
- 4 Delara**
The new Delara tooth line complements the existing Pala product range perfectly and is undisputed one of the highlights at Kulzers' IDS booth. Its bluish tooth edge makes it particularly vibrant.
- 5 HeraCeram Saphir**
Get to know the unique aesthetics of the new ceramic HeraCeram Saphir that was designed to support the aesthetics of restorations – live demos included.
- 6 3D-printing**
Interested in innovations in 3D printing? Full denture printing, new CAM software as well as new Wash & Cure units are highlights to experience.
- 7 JoStage**
Experience the possibilities for dental photography at the JoStage, the flexible photography studio. Get practical advice from experts on how you can put your work in the limelight.
